

## REMARKS

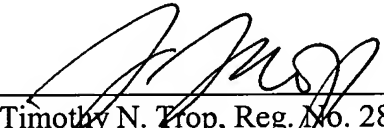

The claims have been amended to call for a catalytic re-combiner in response to the argument that the claims, as currently positioned, do not require catalytic material. While it is believed that a re-combiner must have catalytic material and nothing called a re-combiner is referred to in the cited reference, in order to remove any question, the claims have been amended. Thus, the claims are either in condition for allowance or in better form for appeal and the amendment should be permitted.

In view of these remarks, the application should now be in condition for allowance.

Therefore, since claim 10 is generic, claims 14-17 should also be allowed. See Office Action mailed March 25, 2005.

Respectfully submitted,

Date: August 24, 2005
